I am writing as a citizen that was not opposed to the new hotel but did have some questions . Answers were given but scrapped from what I can tell. What happened to busing guests in? And employees? The scale of the hotel is so out of proportion with Rockport Village. What is going on? With future rooftop bar decks and weddings every weekend in the harbor, are we turning into some kind of theme park or party town? Have you forgotten Rockport for money, money, money? We can be prosperous while leaving some kind of class intact. Things were done behind closed doors and now we are seeing what is emerging. Stuart Smith is doing exactly as he pleases, while his planters outside of his hotel in Camden remained dried up and unwatered.

I agree with other residents that things need to be reassessed. The governing group of this town has gone crazy. I appeal to you to take another look at what you are all creating. It's a monster.

Sincerely
